FEED FATS

CREMER OLEO supplies single and complementary feed materials for providing livestock with fat-based feed components. Our feed fat blends are composed of various vegetable oils, fatty acids and their distillates. If you are looking for a new or customized fat blend, we can help you identify the appropriate product composition. Our products are available for GMP+-certified product areas, and non-GMO grades are available for numerous product variants. We can offer palm-based products according to the RSPO standard. Our products are delivered in all common packaging forms and fillings according to your requirements.

» PORTFOLIO

■ CALCIUM SOAP

- Bypass fat, used in feeding concepts for dairy cows
