FEED FATS

CREMER OLEO supplies vegetable feed fats as individual and supplementary feedstuffs for the optimum supply of livestock. Our feed fat blends are composed of various vegetable oils, fatty acids and their distillates. If you are looking for a new or individual fat blend, we will give you detailed advice on the composition and effect of your planned product.

Our products basically comply with the GMP+/QS standard and are almost exclusively Non-GMO. We can offer palm-based products according to the RSPO standard. Our products are delivered in all common packaging forms and fillings according to your requirements.
