BIOETHANOL

Bioethanol from CREMER OLEO is a natural and sustainable product. It is also known as agricultural ethanol and is produced by fermenting biomass containing sugar, starch or cellulose or sources from plant waste products. The process produces a water-soluble, colorless alcohol that can be used in cosmetics, pharmaceuticals, food or technical applications.

We import our sustainable bioethanol in **various grades through** long-term partners and **professional supply chains from Europe and overseas.** In Europe, we have highly professional tank storage facilities and deliver at short notice. We offer special fillings in IBC containers.

» PORTFOLIO

- CremerETHANOL ENA 96
- CremerETHANOL ENA 99
- CremerETHANOL REN 96
- CremerETHANOL REN 99
- Bioethanol 90-94%

» INDIVIDUAL DENATURATIONS

CREMER OLEO supplies denatured and undenatured ethanol. We are happy to undertake customer-specific and special denaturations for you, even at short notice and in larger quantities. Please contact us if you need individual denaturations e.g. for cosmetics. We always try to find the best solution for your specific requirement.

» BIOZIDE APPROVAL

Industrial bioethanol from CREMER OLEO may be used as a biocide in the EU: We have been included in the Article 95 list by ECHA, the European Chemicals Agency.

» CREMER OLEO STANDARDS
