

Our wide range of basic soaps, which we usually supply in the form of easy-to-process pellets ("soap noodles"), can be combined with any additives for even more care, foam, fragrance or color. The CremerSAP soap base **mainly consists of vegetable oils** and is obtained by the traditional batch process or by continuous saponification. In addition to our soap noodles, we also offer pellets for syndet bars. Please feel free to contact us!

## » PORTFOLIO
