## SYNDET BASE

“Solid cosmetics” and “waterless beauty” are among the most important trends in natural cosmetics. That is why we have supplemented our wide range of soap noodles with pellets for the production of syndet bars. They require virtually no water and are only foamed when used. This makes them **particularly economical** and means they require **significantly less packaging** than liquid care products such as shower gels or shampoos.

CREMER OLEO's soap-free syndet pellets are the ideal base for solid face, body and hair care products. Depending on your requirements, they can be supplemented with a variety of active ingredients or additives, for example for even more care, foam, fragrance or color.

With a pH value between 5 and 7, they are **particularly skin-friendly** and very economical. All Syndet bases are **vegan** and are manufactured **without animal testing**. They are also partially SLES, phenoxyethanol and silicone free.

### » PORTFOLIO
