Cremerlin®PURA is a **purely vegetable** cream base made from a blend of natural triglycerides. Due to its high degree of occlusivity and the associated low transepidermal moisture loss (TEWL) Cremerlin®PURA has properties similar to petrolatum. This makes it suited for use in **rich creams** where conventional petrolatum was previously used. The **light emulsion** leaves the skin feeling rich without being sticky. Cremerlin®PURA is **food compliant** can be used in a wide range of personal care applications. Cremerlin®PURA is based on renewable vegetable raw materials and is manufactured in Germany using a patented process. It is odorless and allergen-free. A low iodine and acid value provide high oxidative stability, allowing it to be easily used for 36 months or longer in a variety of cosmetic formulations.

Cremerlin®PURA can be further refined in hot and cold process. To maintain its crystalline structure, we recommend storage below 25°C. At a processing temperature of more than 60°C, the structure of Cremerlin®PURA may change irreversibly, but the above-mentioned properties are retained. Cremerlin®PURA is not soluble in water or glycerol, but is **compatible with other cosmetic oils and fats**.

» PORTFOLIO

- **Cremerlin®PURA vegetable Cosmos/ Natrue non-organic RSPO/MB |**
CAS No. 73398-61-5 / 68334-28-1
INCI: Caprylic/Capric Triglyceride (and) Hydrogenated Rapeseed Oil

» CREMER OLEO STANDARDS

VARIETIES

Allergen free, Non GMO, Food compliant, REACH registered, Natrue conform, COSMOS non-organic approved, Vegan, China compliant

FORM

Semisolid, White

PACKAGING

Buckets (25 kg)

CERTIFICATIONS

Halal, HACCP, ISO 9001, RSPO SCC

Further variants on request.
