FATTY ALCOHOLS

Fatty alcohols from CREMER OLEO are exclusively of natural origin and are produced from 100% vegetable oils. Our offer includes the long-chain fatty alcohols C16, C18, their blends C16/18 as well as C18/22 and C22/70. The chemical properties of CREMER OLEO fatty alcohols make them ideal for applications in cosmetics and personal care. They are typically used as ingredients in shower gels, shampoos, creams and lotions, for example as emulsion stabilizers, consistency enhancers and to increase the viscosity of a formulation. In the industrial sector, the paper industry uses fatty alcohols from CREMER OLEO.

» PORTFOLIO

- **CremerAL 16/18 (30/70), (50/50)**
CAS No. 67762-27-0 | Cetearyl Alcohol
- **CremerAL 16/98**
