

CREMER OLEOSERV

FLEXIBLE FILLING SOLUTIONS FOR WATER-HAZARDOUS SUBSTANCES

Photos: E. Shambroom Photography

CREMER OleoServ offers flexible filling solutions for water-hazardous substances in the immediate vicinity of the Port of Hamburg and the A23 and A7 highways. You organize the delivery by truck, we take care of filling, storage and transport to your plant quickly and reliably. We are also happy to develop individual solutions that are specially tailored to your requirements.

» WHAT CAN BE FILLED?

- Liquid chemicals water-hazardous-class 1, 2 and 3
- Flash Point > 60° C
- Delivery in 1- or multi-compartment vehicles or insulated tank containers
- Filling in drums, IBCs, 20 l canisters

Do you have special requirements?

Please contact us so that we can find the best solution for you – even at short notice.

» LABORATORY SERVICES

- Incoming goods inspections according to your individual specifications
- Density, viscosity, pH value, acid value and more

» TRANSPORTATION AND STORAGE

After filling, we are happy to temporarily store your containers for 1-2 days. For a longer storage period, transportation to your production site within the EU or individual logistics solutions, we work hand in hand with an experienced logistics partner.

Possible storage classes:

2 B | 3 | 51 B | 61 A/C | 8 A/B | 10 | 11 | 12 | 13
